

Think Safety, Act Safely

Remember to always stay
away from the work area
and the truck where
linemen are working.

They have an important job
to do, and so do you-to stay

AWAY and stay **SAFE!**

Playing it Safe
Around
Electricity

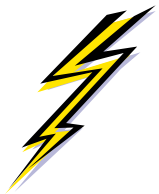

A safety brochure for kids
and their parents

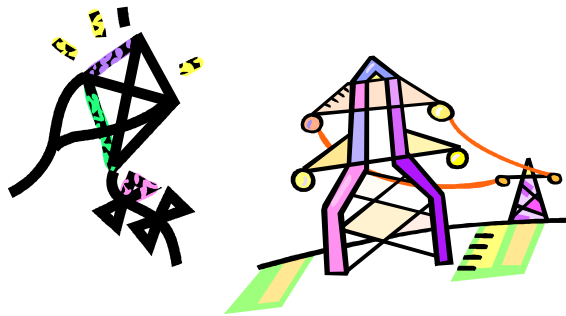

Play it Safe!

Electricity is the most widely used form of energy. It is everywhere around us—where we work and play, indoors and out. It has many sources and it is something that is used everyday.

You can't see electricity, or smell it. Therefore, electricity can be very dangerous. Playing it safe applies to adults as well as children.

REMEMBER: Lightening is a natural form of energy that can be very dangerous also!

Never Play Around Power Lines

This includes :

- Flying a kite
- Climbing a ladder or a tree
- Raising an antennae

Power lines are **DANGEROUS!**

Especially **Downed** power lines!

"When the lines are down,

Don't stay around!"

Obey what the signs say

- Danger
- High voltage
- Keep Out

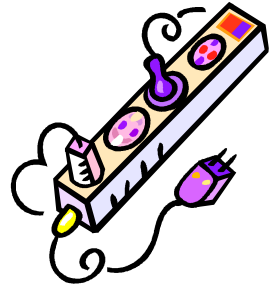

They are all there for a reason—

TO KEEP YOU SAFE!

Keep fingers and keys
away from these!

Only plugs should go
into outlets.

Never pull a plug out
by the cord!

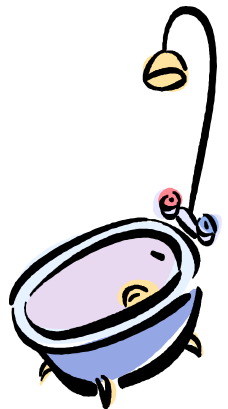

Never mix electricity with water!

Never use
radios, dryers

or anything electrical

around baths
or showers!

Never swim or play outside when
it's a rainy day!

Water, metal and tall
objects can attract
lightening!
